- 7 Carriers support this LTL benchmarking project by providing twice-monthly data
- We collect data on tonnage, shipment, rate/100wt (excl fuel), and avg length of haul
 - These data are aggregated across carriers on an unweighted basis (so smaller carriers with fewer shipments contribute equally to the group average equally with larger carriers. We judge this as necessary to protect carrier anonymity until the sample size of participating carriers is larger).
- We typically turn around these reports within a week of the close of the period in question.
